

Enabling Mobile Workers

With RingCentral® Office

Spectralink integrates with RingCentral Office, a global UCaaS cloud platform, to support your business with a modern and unified approach to your enterprise’s digital transformation journey.

The Spectralink product portfolio directly integrates with the cloud-based RingCentral phone system to deliver a secure and reliable communication network to your workforce globally through purpose-built enterprise mobility devices. Spectralink devices are easy to implement, seamlessly integrate with RingCentral, and can be centrally managed by enterprise IT and Telecom Administrators through AMIE® (Advanced Mobile Intelligence for Enterprise), a cloud-based mobile analytics dashboard that completes your mobility solution.

Integration with RingCentral empowers mobile workers with access to the same tools as office and remote workers securely uniting voice, data, and people for more efficient collaboration. With Spectralink and RingCentral, interaction throughout the workforce is made easier and offers employees more flexible work options ensuring they can collaborate no matter where they work.

Our partnership with RingCentral also provides interoperability with these and other leading cloud platforms:

Spectralink's Mobile Solutions for RingCentral Office

Versity Family of enterprise-grade Wi-Fi smartphones and 84 Series Wi-Fi feature phones

Spectralink has validated the interoperability of 84 Series feature phones and Versity 92 and 95/96 Series smartphones with the RingCentral platform for a streamlined enterprise communication solution. Versity smartphones and 84 Series feature phones offer best-in-class voice quality and a variety of functionalities to support your mobile team members in the healthcare, retail, and manufacturing industries.

Spectralink IP-DECT Server 200/400/6500, Virtual IP-DECT Server One and the 7000 Series DECT Handsets

The feature-rich, application-enabled Spectralink DECT mobile handsets along with the secure, flexible, and scalable DECT infrastructure are certified with RingCentral. The certification of the Spectralink DECT portfolio ensures interoperability even as your business communication needs change and grow. Choose from a variety of system infrastructure and handsets to provide your enterprise with a solution that offers the highest standard of DECT security in the market and meets the functionality requirements of your mobile workforce in manufacturing, retail, hospitality, and elderly care environments.

As your business makes the transition to cloud-based infrastructure, Spectralink's purpose-built devices and the RingCentral Office platform makes mobility work for your enterprise. This combined UCaaS solution enables your mobile workforce to connect, communicate, and collaborate with crystal clear voice connections to get the job done.
